

Tips for Hokies During Covid-19

Quarantine if you feel sick

Do my roomies have to also quarantine?

Yes, if one person starts to feel ill, the whole house should begin quarantining.

Go to the grocery store later in the day

How would that help?

This is so immunocompromised, older adults, and other vulnerable community members can shop safely at earlier times.

Form social pods

What is a social pod?

Social pods are small groups (up to 5 people) who socialize regularly and agree to only socialize together. When outside of their pods, each member should be responsible for wearing a mask and physically distancing.

Go out to eat later in the day

Why?

This is so immunocompromised, older adults, and other vulnerable community members can enjoy Blacksburg safely as well.

Make smart choices

What is my responsibility?

Your actions can affect others in the community. Avoid activities that may put you in environments that may spread Covid-19 easier (i.e. Jail or ER).

Take care of each other and prevent campus closure

What does this mean?

- If you feel sick, let your roommates know.
- Don't attend parties.
- Try to attend events virtually (i.e. Religious services, Greek Life, Concerts.)

If you live in a dorm...

Why is a dorm different?

- Covid-19 is easily spreadable in a place like a dorm
- Physical distance and wear a mask in communal areas
- Avoid hanging out with people who don't live on campus to control spread between on and off campus

BE COMMITTED. BE WELL.
HELP PROTECT BLACKSBURG AND
OUR COMMUNITY .
